

Marlink Sealink

Multi-LEO connectivity simplified for maritime

One data allowance. One subscription. Across multiple LEO networks.

Marlink delivers a single, vessel-specific data allowance operating seamlessly across Starlink and Eutelsat OneWeb under one subscription.

No split allowances.
No multiple contracts.
No operational complexity.

Just simplicity at sea.

What is included in Sealink Multi LEO

- Marlink LEO allowance (blending Starlink & One Web).
- Marlink Possibility Platform, XChange NextGen - SD-WAN
- Real time advanced monitoring dashboard and self-service features in Marlink Portal360
- Marlink managed services and support

Why choose Marlink

Marlink is the only maritime connectivity provider to deliver one data allowance operating seamlessly across Starlink and Eutelsat OneWeb under a single monthly subscription - with no split allowances, no multiple contracts and no operational complexity.

Powered by the Marlink Possibility Platform, Multi-LEO becomes more than connectivity, it becomes an enabler of resilient operations, consistent digital performance and fleet-wide standardisation.

Why choose our Sealink Multi-LEO

- Improve resilience and high bandwidth uptime
- Support simple to complex network solutions
- Optimise digital performance
- Simplify fleet operations
- One partner. One service model
- Secure your communications
- Future proof and network agnostic, Marlink can quickly integrate the latest best-in-class LEO or GEO bearers into the solution.

Flexible commercial plans

- Large variety of Subscription plans ranging from 500GB to Unlimited
- Flexible Pool / SCAP options
- Possibility to purchase or lease LEO HW (36/60months)
