

**4G SERVICES FROM MARLINK PROVIDES ULTRAFAST BROADBAND CONNECTIVITY. THE IDEAL SEALINK VSAT COMPANION WHEN NEAR SHORE, ALL SEAMLESSLY MANAGED AND CONNECTED.**

Marlink's 4G Services comprises a portfolio of low latency, high bandwidth multicarrier solutions, providing high quality connectivity anytime, anywhere. Comprising of offshore Tampnet LTE and Global4G terrestrial services, the solution is designed to complement our Sealink™ VSAT services, and further secure the reliability and high bandwidth needs for vessel and fleet management.

Based on the user's predefined parameters, Marlink's hybrid connectivity seamlessly combines multiple communication carriers (SatCom and terrestrial) to provide the best available link. Thus ship owners maintain full control of how communication is routed via a management interface, allowing them to set priorities according to their own requirements and preferences at any given time.

**COMPATABILITY**

4G Services are available for all Sealink users and as a standalone connectivity option.

Diverse connectivity options can be facilitated within the 4G Services portfolio:

**Global4G:**

Cost-efficient communications provided through the latest terrestrial 3G & 4G technologies

- Data rates of up to 100 Mbps (4G)
- One SIM that can be used in >100 countries around the world
- Attractive money allowance packages to suit all business and leisure needs

**Tampnet LTE:**

- Tampnet low-latency LTE service up to 50 Mbps,
- Available in North Sea & Gulf of Mexico

**Near Coastal WiFi:**

Optional WiFi – connect to wireless networks with bandwidth up to 100 Mbps when ports are within reach
