

KEEPUP@SEA

KeepUp@Sea – powered by Palantir, is the IT operational platform that enables our customers to standardise, simplify and automate their vessel IT environment, enabling fast migration and effective operation of IT services across the fleet.

Marlink Group company, Palantir has dedicated technicians with specialised competence in the area of maritime IT, meaning customers benefit from expert delivery and support as well as simplified onboard network management.

KeepUp@Sea has a proven track record of increasing network stability, cutting operational costs and reducing IT support to a minimum – whilst simultaneously improving the flexibility to handle future growth and a controlled change process.

We provide advice, system design, installation services, hardware deliveries, logistics, and operational services. For the operational phase, Marlink provides the modules needed to deliver a fully managed service for our customers. For a fixed fee per vessel per month, KeepUp@Sea can either be adopted to be operational in conjunction with your onboard personnel or as a fully outsourced service.

We strive to simplify and automate vessel IT-management through their onboard IT solution, KeepUp@Sea. Palantir's solution and services are in daily use by thousands of seafarers on vessels operating all over the globe. In close cooperation with customers, Palantir deliver the total platform with customisation, IT equipment and logistics, installation onboard and operation. Palantir's vision is to go onboard the vessel once and never again.

Key Benefits

- **Increased stability:** KeepUp@Sea is a professional IT operational framework with the proven ability to increase onboard IT stability, cut operational costs and reduce vessel support needs to a minimum

- **Fleet wide control:** KeepUp@Sea offers a highly automated and standardised framework for servers and computers, bringing you in control of changes and upgrades both onshore and onboard. Shore staff can maintain a transparent overview of the operational status of the fleet using the simple-to-use Dashboard feature

- **IT made easy:** The solution enables onboard staff with limited IT competence to deal with error situations in an easy and straightforward way

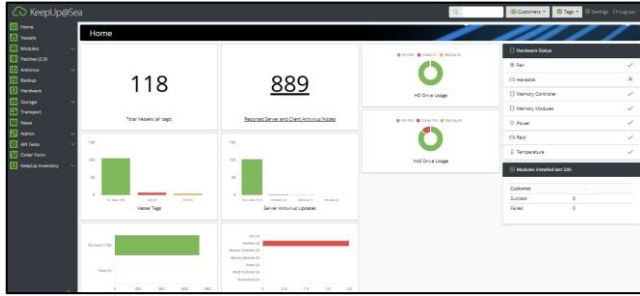

- **Support:** Support is available from personnel with extensive experience in working onboard vessels, who know the terms and have the capabilities to promptly solve any challenges that may appear

- **Full system compliance:**
 - High availability and reliability
 - Scalable and flexible
 - Shore based application and inventory control
 - Service and system monitoring
 - Built on Microsoft operating systems
 - Easy migration to different communication footprints
 - Change Management

KeepUp@Sea DASHBOARD FLEET MONITORING & REPORTING

The KeepUp@Sea Dashboard is developed and specialised to fulfil critical monitoring tasks in the most simple and intuitive way. By using the web-based Dashboard, customers are presented with a complete overview of the health status for critical components on board – verifying that backup is performed and that anti virus definitions are up to date – all in one place, by one click, for the whole fleet!

The KeepUp@Sea Dashboard enables full control over your fleet performance. As a unique solution to monitor the status of critical ICT components and business-critical applications for your fleet, ship operators can gain a full, transparent view of services delivered.

KEY FEATURES

- Server components monitoring
- Backup monitoring
- Anti virus monitoring
- Vessel particulars
- Disk usage on server
- Application version control

KeepUp@Sea INVENTORY INVENTORY MONITORING

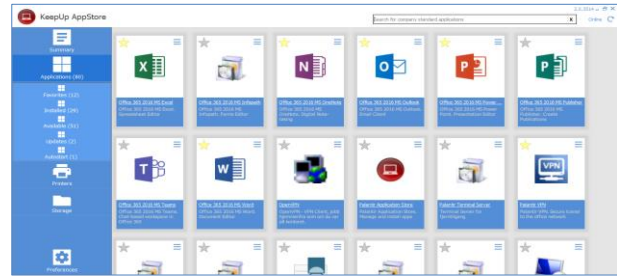

KeepUp@Sea Inventory comes with a variety of scanning methods, which can be used standalone or in combination with others. Most of the scanning methods do not require manual intervention. A wide range of computer details are scanned for Windows machines. Hardware, software, event logs, Windows updates and product keys are just a few of the items customers will now be able to report on.

The KeepUp@Sea Inventory helps you with your Network Inventory and Asset Management and proactively alerts you of non-compliance issues before they become a problem.

KEY FEATURES

- Software Inventory
- License Compliance
- Active Directory integration
- Compliance
- Event log

KeepUp@Sea APPSTORE FLEET WIDE APPLICATION CONTROL

The KeepUp@Sea AppStore is a unique solution facilitating the deployment and access for the onboard functional end users to business-critical applications across your fleet.

KEY FEATURES

- Automated application self-service installation
- Automated application repair function
- Automated application update function
- Automated self-service PC installation

KeepUp@Sea BACKUP BACKUP YOUR BUSINESS-CRITICAL DATA

If an incident happens, don't let it be the end of your business; benefit from a proven business data recovery solution with KeepUp@Sea Backup. Our easy and affordable backup service prepares you for anything: from an employee accidentally deleting a critical file from the server to lost or damaged equipment, we help you ensure that your business data is protected at all times.

Custom-made for seafarers, the highly optimised backup solution provides proactive protection of all vulnerable data produced onboard your vessels and safeguards the recovery procedures if needed.

KEY FEATURES

- USB Support
- NAS Support
- One Click Backup/Restore
- Database Support
- Scheduled Backup
