NOAD Schema 3.7 and Workbook 7.7 -- 90 day Notice

11/18/2020 - 14 Days Ago

As part of ongoing efforts to enhance maritime domain awareness, we continue to improve handling of essential data contained within Notices of Arrival and Departure (NOAD). On Thursday, 18 February 2021, a new schema (3.7) and workbook (7.7) will be released. This new schema and workbook have several changes to Cargo and CDC, the ability to cancel a notice and several miscellaneous changes. Part of this effort will include retiring the 3.5 schema and 7.5.1 workbook and no longer supporting them. Additionally, the Multiple Arrival Workbook OCS 1.5.1 will be retired and no longer supported.

Please note that while every effort is being made to ensure all information is accurate as of this posting, there exists the possibility for additional changes as needed or at the direction of the program office. Any such changes or additions will be made available as soon as they are provided to or identified by the NOAD team.
