

JOB DESCRIPTION

POSITION: Product Development Engineer

DIRECTION / UNIT / DEPARTMENT: TECHNOLOGY / PRODUCT DEVELOPMENT

MANAGER: Director Product Development

LOCATION: Aussaguel (Toulouse)

HR CONTACT: hr.france@marlink.com

MISSION:

The Product Development Engineer main mission consists in driving the development of innovative products and services, from the high-level concept to the commercial launch, in an international, exciting and challenging environment.

Withing the Product Development team, the Engineers lead the software engineering and development of a large portfolio of digital solutions and services over satellite in areas like Smart routing, Network Service Delivery, Messaging, Prepaid services, IOT, Mobile Applications, Traffic Routing and Analysis, Telephony, Content Distribution, Video, Data analytics, Cyber Security involving a large range of IT, network and telecommunication technologies.

The Engineer imagines and designs these solutions in coordination with Marketing department, selects and manages external suppliers and vendors, drives the software development and integration project, supervises the validation and the deployment in operation, contributes to the success of the commercial launch.

The candidate shall come with a strong technical education and experience, demonstrate excellent project management skills, be able to interact professionally with variety of stakeholders. The candidate shall be passionate about technologies, and be familiar with telecommunication and network technologies, cyber security, IoT platforms & protocols, data analytics, as well as bring hands-on experience in such domains. The candidate shall be an organized autonomous self-starter with excellent written and oral communication skills, enjoy technical research and problem solving, and actively seek out opportunities for improvement.

As Product Development Engineer within Marlink, you will have the unique opportunity to hold a true cross-functional and end-to-end role, to get involved in all aspects of the satcom business and to have a direct contribution to the success of the company.

MAIN ACTIVITIES:

- Lead the technical development of products from high-level concepts to commercial launch
- Translate commercial demands into technical requirements, prioritize features, ensure the end-to-end service integration
- Coordinate and animate a network of stakeholders across departments contributing to the product development (engineering, operation, IT, support, billing...)
- Issue RFP toward potential integrators and software development contractors, drive the bidding process
- Manage outsourced development and developers and drive integration projects
- Coordinate the internal implementation of the services with product management and operational teams

- Perform the acceptance tests and supervise the operational deployment
 - Deliver progress reports, technical documentation and presentations
 - Lead support escalation process towards software manufacturers
-

QUALIFICATION:

- Master Degree in Engineering, Computer Sciences and Telecommunications
 - Significant education (Master degree) and strong experience (+5 years) in project management
 - Strong education and hands-on experience in IP networking, Cyber Security and Systems Engineering
 - Good education and experience in Software Engineering
 - Experience as System and/or Network architect is a plus
 - Experience in working with consultancy and vendor
 - Working experience in an international environment and transnational organizations.
 - Fluent English both written and oral
-

PERSONAL SKILLS:

- Strong communication skills
 - Creative, innovative, curious, team-player, open-minded, autonomy
 - Leadership, willingness and ability to take initiative and work independently
 - Ability to work in international environment, willingness to travel
-
