

Project Manager – Cyber Security

Company:	Marlink
Business Unit:	IT & Security
Department:	Product & Project Management – Cyber Security
Manager:	Patrick Decool
Location:	Any Marlink European office (Paris, Den Haag, Hamburg, Oslo, Toulouse)
Type:	Full Time

Job Description

Main Mission

The manager's main mission will be to support Marlink's ambition in strengthening their cyber security market leadership in the Maritime industry.

As part of the product & project team, the manager will be responsible for driving high priority projects, dealing directly with key customers, coordinating with them the design and delivery of best-in-class cyber security services, to meet our clients' business expectations and match regulatory requirements.

The manager shall demonstrate excellent project management skills, be able to interact professionally with variety of stakeholders (customers' staff, Marlink senior management, and key partners), and feel very comfortable in holding presentations in English at customer meetings or to board members.

The manager shall be passionate about technologies, and specifically be familiar with cyber security products, telecommunication, and cloud services, as well as bring concrete hands-on expertise in these domains.

The manager will be joining the market leader in satellite and advanced maritime ICT services, enjoy evolving in a very international environment, and working in a multi-cultural context.

Main Activities

The manager will be performing the following activities:

- Act as a transversal expert of the Marlink cyber security product portfolio
- Work closely with colleagues in the product & project team to share ideas and suggest service evolution and improvements
- Acquire product, process, and market knowledge within the maritime industry to identify opportunities in cyber security
- Co-create & design cyber security solutions in close relation with Marlink's key customer and their commercial and technical staff
- Draft project proposals, establish project plans, create work streams, design high-level technical architecture diagrams

- Setup multi-disciplinary project teams, coordinate and animate a network of stakeholders (engineering, IT, customer support, billing...) to deliver the targeted services, with focus on delivering at costs, on quality & on time
- Propose proof-of-concepts or run pilot projects, and take end-to-end ownership on these projects
- Communicate effectively and regularly on roadmap / progress, issues & challenges to internal stakeholders with a solution-driven approach to overcome them
- Coordinate large service deployments with key accounts
- Monitor customers' satisfaction and the delivered service quality

Required Qualification & Skills

Education / Qualification

- At least 5 years' experience in telecommunication or ICT industry
- University master or similar degrees
- Strong comprehension of network security & endpoint security, and UTM solutions
- Professional records in project management
- Excellent MS office tools skills, in particular PowerPoint, Excel & Visio
- Excellent & oral and written communication skills in English

Personal Qualities / Attitude / Competences

- Team-player, trustful and reliable
- Passionate by technology and innovations, driven by technical & commercial disruptive challenges
- Self-motivated, creative with a high-level of energy, excellent interpersonal, organizational, communication and leadership skills
- Ability to drive teammates with various background and level of seniority, and geographically distributed
- Excellent problem-solving abilities, result-focused with ability to work under strong pressure
- Ability to structure complex information, plan, prioritize, delegate tasks, and focus on deliverables
- Willingness & readiness to travel in relation to work activities
