

## Power fast & seamless Starlink connectivity with Sealink NextGen

As experts in managed hybrid connectivity, our Sealink NextGen securely integrates the high speed, low latency Starlink service into your network

### Transform your possibilities

With improving safety and efficiency always a focus, your vessel operations can be transformed with an integrated Starlink solution, bringing access to the cloud, real-time data management and a seamless user experience.

### Revolutionise crew experience

The high speeds Starlink can deliver enable you to attract and retain skilled crew with fibre-like internet speeds capable of powering online streaming (like Netflix or gaming), while our sophisticated tools give you the full control to monitor, secure and economise crew web access.

### Business agility

Our smart routing/SD-WAN solution provides you with greater business agility and responsiveness to keep pace with IT innovations and use of applications. It securely blends satellite, 4G/5G and wireless, and maximises performance by dynamically adjusting traffic flows based on the best available network conditions.

### Flexible and fast

With flexible service plans and download speeds of up to 250 Mbps, plus small-footprint, flat panel terminals, Starlink can be added to your existing network with the support of our experienced engineers.

### The Marlink Difference

At the core of our offer, our XChange Smart Management platform is packed with expertly designed tools and applications to efficiently run your network:

- Seamless integration of multiple network providers with automatic routing ensures global coverage and guarantees service availability
- Traffic prioritisation and restriction, with access control keeps you safe from bill shock and guarantees consistent business critical communication lines
- Firewall, data security and virus protection give you full peace of mind
- Crew management tools support crew welfare, health & training

Every Marlink solution includes the following enhancements and support:

- Custom designed network
- The latest technology harnessed to secure all your hybrid connectivity together
- Free self-admin tools, subscription info, dashboard monitoring and real-time vessel position info in Portal360
- 24x7 Best-in-class Support
- Plus, professional managed services tailored to you

# Transform your operations with our integrated Starlink solution

## Seamless blended networks

Blended, seamless routing delivers the advantages of a fast LEO network with the highest available uptime

## Migration of access to the cloud

Continuous cloud access to maintain applications, monitor critical data and optimise performance.

## Boosted user experience

Faster internet means a vastly improved user experience, even powering data-hungry applications

## Advanced network orchestration

Built-in redundancy, with optimised network configuration to route and prioritise traffic

## Enhanced network security

Leverage SD-WAN to separate network, implement IT policies and securely connect with HQ

## Maximise your Starlink investment in a Sealink NextGen blended solution

### Cyber secure and under control

The potential of Starlink to transform remote operations is clear, but the services are best effort and with a substantial boost in bandwidth comes greater exposure to cyber-attacks. Our holistic solution combined with intelligent routing and cyber security management in the XChange enable you to maximise the potential of your investment, while mitigating cyber risk and maintaining total bandwidth control.

### Accelerate your digitalisation

We support your digital enablement and automation objectives and provide satellite-optimised solutions such as remote IT access, cyber security, and data capture via IoT systems to serve you as a provider of advanced solutions beyond connectivity.

### Optimal user experience

Thanks to strategic our alliances with all major Satellite Network Operators, our Sealink NextGen offer brings together the best connectivity the industry has to offer while ensuring that your business-critical communications are always protected, powering the applications you need with guaranteed CIR-based bandwidth with a built-in SLA. Combine:

- Low-latency LEO/MEO (such as Starlink)
- Our market-leading Sealink GEO VSAT
- Iridium Certus or Fleetbroadband MSS
- 4G/5G (LTE)
- And terrestrial connectivity solutions

### Dedicated service

Our expert consultants guide you through the whole process while we design the ideal network set-up for your needs. Meanwhile we assign dedicated service delivery managers and engineering support, giving you the peace of mind that your network is constantly supported to maintain 100% uptime – so you can keep focus on running your business.

## Are you ready to integrate Starlink connectivity into your remote operations?

Unlock the full potential of your Starlink investment to best benefit your remote business. All designed, managed and supported with Marlink's 25+ years' of experience as the industry leaders in maritime connectivity.

To discover more about how an integrated Starlink solution can boost your crew satisfaction, power your digitalisation and maximise your operational efficiency, [contact us](#) for a consultation.
