

STARLINK

Land | Mobile | Offshore

Are you ready to benefit from Starlink's Low Earth Orbit connectivity?

Marlink is ready and able to help you integrate Starlink within your current satellite communication network, providing you with low-latency, high speed connection to help you achieve digitalisation and operational goals.

With proven experience and understanding of delivering industry-leading network solutions, Marlink has partnered with Starlink to provide our customers with the benefits of a low-latency connection backed by the Marlink network and our proven support and service.

With download speeds of up to 250 Mbps, Starlink can augment your current network to enhance your team's experience giving them access to fibre-like speeds and a seamless user experience. Alternatively, we can integrate Starlink within your network to help you achieve your digitalisation goals, prioritising all applications and traffic around your needs.

To ensure you get the most from your network, Marlink focus on ensuring we can maximise the reliability of your connections while optimising your overall network and applications to focus on helping you achieve your operational goals.

Key Benefits

- Customised network design to help your operations succeed
- Seamless integration of multiple network providers
- SD-WAN orchestration to enhance reliability
- Help prioritising data and consumption
- Up to the minute customer portal to view all aspects of your network
- Complete Starlink kit, with options for installation
- Enhanced network security
- Dedicated Service Delivery team
- 24x7 Best-in-class Customer Support & NOC
- Simplified billing and administration of networks

Land Solutions

Land solutions designed to optimise your performance and integrate seamlessly within your existing network.

- Managed Land or SD-WAN service packages
- Data packages from 1TB to 6TB
- Dedicated support & NOC
- Dedicated account manager
- Public fixed IP address
- Optional long wall mount

Mobile and Offshore Solutions

Mobile and offshore solutions created to enhance reliability, improve crew welfare and advance your digitalisation goals.

- Managed or SD-WAN packages
- Data packages of 1TB or 5TB with single or dual antennas
- Dedicated support & NOC
- Dedicated account manager
- Public fixed IP address
- Optional radomes and housing

Solutions Created Around Your Needs

We design and build your solution by intelligently integrating network and digital solutions, orchestrated via our secure SD-WAN technology, and end2end managed by our network operations centre and customer support to keep your operations and assets running successfully.

Based on our industry experience, we create personalised Starlink solutions to succeed in harsh and remote conditions. From developing custom housing solutions for Starlink offshore to sourcing the best radomes for starlink antennas, we ensure your Starlink solution is to adapt to your operational environment.

Smart Network Solutions

As a leading network integrator, Marlink has a technology-agnostic strategy for ensuring we can provide you with the connectivity solution that best fits your needs. Partnering with our industry-leading partners, we combine the latest LEO and MEO systems into our proven Smart Hybrid Network solution.
