

Product Owner – Cyber Security Paris, France

About Marlink

Marlink is a trusted partner in fully managed smart network solutions, based on an intelligent hybrid network and unrivalled digital solutions.

A true partner, who goes Above and Beyond to help you run your remote operations in ever smarter, more profitable, and sustainable ways to give you the competitive edge. In today's world, the power to connect your business operations and assets, even in the most remote and challenging places, has never mattered more.

At Marlink, we design, build and manage smart network solutions around your individual needs. We provide trusted global coverage, through our intelligent hybrid network combining satcoms, terrestrial technologies and digital.

Your Mission

Prompted by new business opportunities and helped by more abundant bandwidth, cyber threats have recently increased significantly in all industries Marlink is delivering its services. For these reasons, as well as stricter regulatory requirements, Marlink has accelerated the upgrade and expansion of its cyber security service portfolio to better defend their customers' assets against more and more sophisticated attacks.

Marlink is looking for a Product Owner to strengthen Marlink's Cyber Security product team. The role requires strong project management skills, a solid technical background in cyber security technologies, but also good understanding of operational challenges and excellent communication skills.

In his/her position the Product Owner will liaise with product managers, our technical departments, as well as our operational departments.

Main Tasks

The manager's main activities will be to:

- Acquire product & market knowledge on the Marlink business, its product portfolio, and its cyber security suite
- Capture and centralize requirements around Marlink's threat detection, endpoint security, network security and associated managed services
- Turn requirements into roadmap, establish milestone plans, and validate these with the product team
- Manage feature back-logs, ensure quality of delivered specifications, as well as prioritisation towards development and operational teams, in line with commercial opportunities
- Setup own project governance, coordinate with stakeholders from the various departments (engineering, customer support, billing, collection, ...) and secure service integration within the entire Marlink organisation
- Work with operational and technical teams to simulate end-to-end use cases in dry run / testbed before rolling out in the field

- Deliver professional documentation for internal support teams (process description, FAQ, etc) as well as for customers (user-manuals, etc); train Marlink support organisation about the service and how to handle issues
- Run regular risk analysis and propose mitigation action plans
- Publish regular reports about the integration status and progress

Qualifications & Professional skills

- University master or similar degrees, preferably in network engineering / cyber security
- Professional records in project / program management
- Solid comprehension of network & endpoint security, detection, SOC, remediation services
- Good commercial understanding
- Proven working experience in an international environment and transnational organizations
- Excellent MS office tool skills
- Fluent in English written and spoken (at least B2 level)

Attitude & Interpersonal skills

- Team-player, trustful and reliable
- Passionate by technology and innovations, driven by technical & commercial disruptive challenges
- Self-motivated, creative with a high-level of energy, excellent interpersonal, organizational, communication skills
- Ability to structure complex information, plan, prioritize, delegate tasks, and focus on deliverables
- Excellent analytical, problem-solving abilities, and result-focused with ability to work under strong pressure
- Ability to drive teammates with various background and level of seniority, and geographically distributed
- Structured and persistent, with the drive to create and continuously improve agile processes
