

IVVQ Team Leader France -Toulouse

About Marlink

In today's world, connecting our customers' businesses and assets in the most remote and challenging locations has never been more important.

As a true partner to our global customers, we provide smart network solutions that connect people and assets around the globe and in all markets where traditional connectivity cannot be achieved or is not available.

As an internationally active and well-known group with more than 1300 colleagues working in more than 30 locations, we help our customers in industries including Shipping, Energy, Humanitarian to run their business remotely in ever smarter, more profitable, and sustainable ways.

Your Mission

Marlink develops a cutting-edge all-in-one platform providing a full range of solutions to remote sites like optimized management of connectivity and local networks, cybersecurity solutions, telephony capabilities and many services facilitating our customers' digital transformation.

As an IVVQ Team Lead, you will be responsible for leading and guiding a team of QA engineers in the integration, validation, verification, and qualification of this innovative service platform.

You will collaborate closely with software developers, network engineers, and other cross-functional teams to ensure that our platform meets customer expectations and industry standards.

Main Tasks

Team Leadership: Lead a team of 2 to 4 QA engineers, providing technical guidance, training, and support.

Integration: Collaborate with development teams to ensure the seamless integration of new features into the service platform.

Validation: Develop and execute comprehensive test plans to validate the functionality of the platform.

Verification: Verify that the platform adheres to design specifications and requirements, ensuring that it meets performance, scalability, and reliability standards.

Qualification: Qualify the service platform for deployment in customer.

Testing: Perform end-to-end testing, regression testing, and system-level testing to identify and resolve any defects.

Documentation: Maintain accurate and detailed documentation of test plans, test cases, test results, and any configuration changes.

Collaboration: Work closely with cross-functional and multi-cultural teams, including software development, network engineering, and customer support, to address

Risk Assessment: Identify potential risks and vulnerabilities in the platform and collaborate with the development team to implement appropriate mitigation strategies.

Qualifications & Professional skills

- Master's degree in engineering, Computing Sciences, IT and/or Telecommunications. Or Bachelor's degree with significant experience.
- Proven experience in integration, validation, verification, and qualification of complex systems or platforms.
- Proficiency in Software Development, Web technologies, Networking, Cybersecurity and/or Telecommunications
- Experience in integration and test automation tools and scripting languages (e.g., Python, Bash).
- Experience with Agile development methodologies is a plus
- Familiarity with virtualization and containerization technologies (e.g., Docker, Kubernetes).

Our Commitment

Our Corporate Social Responsibility approach is part of the Marlink DNA to develop our business and people operate responsibly. Marlink has incorporated and respects the Ten Principles of the UN Global Compact into our strategies to establish a culture of integrity, value, trust and innovation.

The Marlink Group is a transnational organization and considers cultural diversity as one of its greatest strengths. Additionally, we support diversity in race, gender, religion, national origin, political opinion, sexual orientation, social origins, age and physical or mental character.

Attitude & Interpersonal skills

- Excellent problem-solving and troubleshooting skills.
- Strong communication and teamwork abilities.
- Leadership, willingness and ability to take initiative and work independently.
- Fluent English with good writing and presentation skills.

We offer

- Flexible hybrid work situation with home office option
